

# DRAGONFLY

Odo Fioravanti / 2013

**IT** Dragonfly nasce dall'osservazione del corpo della libellula, caratterizzato da uno sbilanciamento tra le gambe, poste nella parte anteriore del corpo, e la coda che è a sbalzo.

Da tale gioco formale scaturisce una sedia in cantilever le cui gambe sono innestate sul fronte mentre la seduta sembra sfidare la forza di gravità. A questa versione si sono aggiunte una serie di basi multifunzione in modo da costruire un vero e proprio sistema di sedute

**EN** Dragonfly was born from the likes of the body of a dragonfly which is characterized by an imbalance of weight between the legs at the front and cantilevered tail.

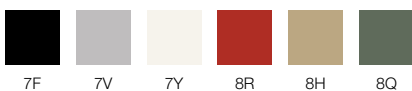

This observation inspired seating which thus appears to challenge gravity; the shell's vertical ribbing mimics wings. Multi-functional bases may be paired with a variety of polypropylene shell colours for chairs and stools.

**FR** La chaise Dragonfly est née de l'observation de la libellule dont elle porte d'ailleurs le nom. En effet, le corps de la libellule est déséquilibré et semble suspendu dans les airs. En matière de design, le résultat donne une chaise à la structure flottante avec une assise qui semble défier les lois de la gravité. Tout en conservant la même coque, la Dragonfly se décline avec différents types de piétements, afin de constituer une véritable famille de produits capable de répondre à tous les besoins et les utilisations.

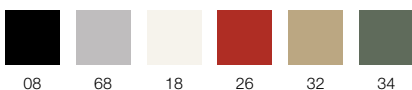

**DE** Dragonfly ist durch die Beobachtung eines Libellenkokons inspiriert worden. Das Ungleichgewicht zwischen den Vorderbeinen und dem freischwebenden hinteren Teil des Körpers. So entstand dieser Stuhl, ein Freischwinger mit vorderen Beinen und einem Sitz, der die Schwerkraft herauszufordern scheint. Eine Reihe von Gestellen ergänzen die Serie.
